

Fai Collection

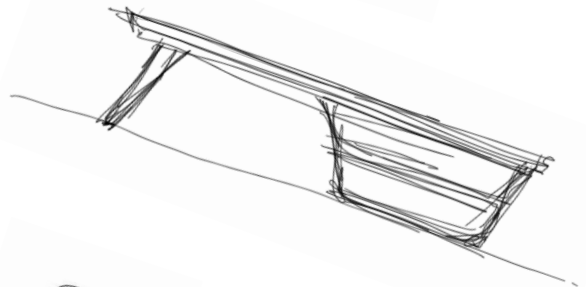

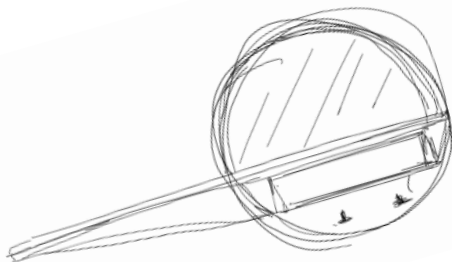

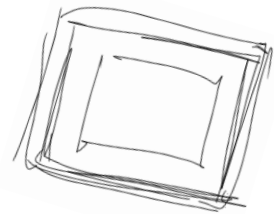

2020

Full product line

2K1M

made in Italy

The Beginning

The Fai Collection is 2K1M's classic line and the first of its collections, "Made in Italy," launched in 2020 at the Toronto Interior Design Show IDS20.

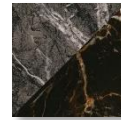

The solid wood curved edge of the door panels and the bold structural base give it its unique character, an ageless design suited to a classic or contemporary residential or hospitality environment.

The Fai Collection is 100% "Made in Italy" with a high level of craftsmanship. It is built out of natural and durable materials such as marble and solid wood for long and lasting enjoyment without losing its character and value.

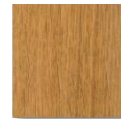

The wood materials in the Fai Collection are FSC certified, and the wood stain/paint finish has no-to low-VOC.

Credenza M01

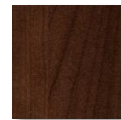

Surfaces

The Creator

The Fai Collection by Naji Mourani.

The Fai Collection collaboration started in 2018, and the idea was to develop a product that would come to mind spontaneously and look unique and everlasting.

This first spontaneous sketch was for the Credenza, which became the basis for all the other units that followed.

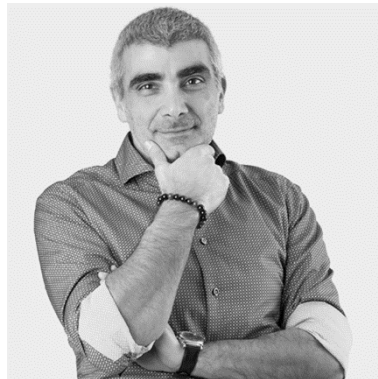

This spontaneous approach and its style are the signatures of the Fai Collection.

The Fai Collection is Naji's first product creation for 2K1M, but his design background goes back to 1996. As an Interior Architect, he designed and worked on projects worldwide in all sectors, including Hospitality.

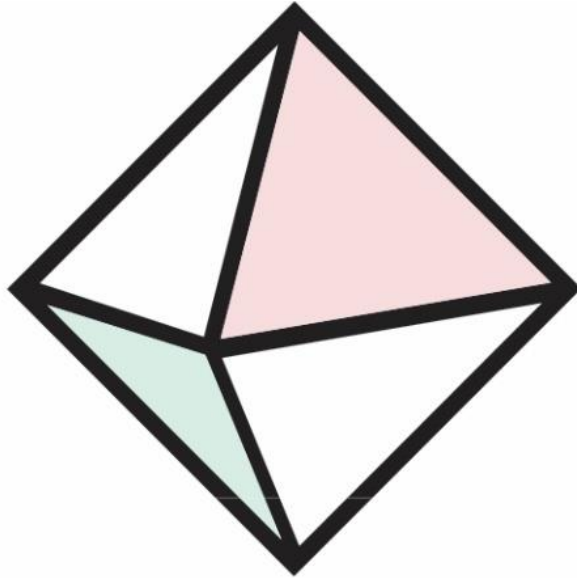

Known for his enthusiasm and perfectionism, he always approaches his design with an intuitive approach and simplicity, calling this approach the heartbeat theory.

He is passionate about beauty, nature, and organic forms and is a world traveler. Always on the look for new materials and discoveries. He enjoys mentoring and assisting future generations by passing on his knowledge and experience.

We look forward to growing the Fai Collection and collaborating on developing many other products and accessories in the future.
